

YASH MUSTERYA

Software Engineering Intern Candidate

Mumbai, India | +91 9867684002 | musteryay@gmail.com | [linkedin.com/in/yashmusterya](https://www.linkedin.com/in/yashmusterya) | github.com/yashmusterya | yashmusterya.vercel.app

SUMMARY

Third-year B.Tech student (Artificial Intelligence and Data Science, Honors in Cybersecurity) with hands-on experience in object-oriented programming, data structures & algorithms, and full-stack software engineering. Collaborates closely with teammates and stakeholders to turn requirements into reliable, scalable solutions, and brings a growth mindset — quickly learning new tools, technologies, and best practices to continuously improve product quality.

EDUCATION

K J Somaiya College of Engineering, Mumbai <i>Bachelor of Technology, Artificial Intelligence and Data Science, Honors in Cybersecurity CGPA: 9.29/10</i>	Expected 2028
Indian Institute of Technology (IIT) Madras <i>Diploma in Programming Grade: 7.04/10</i>	2026
Pace Junior College of Science, Mumbai — HSC <i>Grade: 71%</i>	2024

TECHNICAL SKILLS

Languages: Python, Java, C++, C, SQL, JavaScript, TypeScript, HTML/CSS

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), RESTful API Design, Database Design, Software Testing & Debugging

Frameworks & Tools: Flask, Flask-SQLAlchemy, Vue 3, Git/GitHub, MySQL, Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

WORK EXPERIENCE

Deepcytes.io Ventures — Cyber Research Analyst (Intern)

- Collaborated with the security team to conduct digital footprint analysis, identifying cyber threats and exposed assets.
- Designed and built a live cyber threat map, a real-time data visualization tool using geolocation data, improving monitoring and observability of active global threats.
- Used AI-powered tools for threat detection and pattern analysis; performed cyber audits and implemented counter-surveillance and ransomware-protection measures based on best practices.

PROJECTS

Car Parking Booking System — Flask, Python, SQL, Flask-SQLAlchemy, REST APIs

- Designed and developed a full-stack web application for booking parking slots across multiple locations, applying object-oriented design principles across backend modules.
- Built RESTful APIs and normalized SQL data models with Flask-SQLAlchemy to deliver a scalable, reliable booking experience for users across multiple locations and concurrent bookings.
- Implemented secure user authentication using encryption and hashing techniques, improving the reliability of sensitive user data protection.

Trek Management App (TMA) — Flask, Vue 3, Python, JavaScript

- Architected a full-stack trek-planning application with a Flask backend and a Vue 3 frontend, applying modular, object-oriented backend design for maintainability.
- Conducted a proactive security review of the codebase, identifying and remediating hardcoded credentials and exposed configuration values to improve reliability.
- Iterated on feature requirements with stakeholders and incorporated feedback across the stack, reflecting real-world, team-based software development workflows.

LEADERSHIP & ACTIVITIES

Riidl (Somaiya Innovation & Incubation Center) — Ambassador: Coordinated mentorship for early-stage startups and organized tech-driven innovation events. **Symphony, KJSCE — Organising Team Member** (Nov–Dec 2024): managed event planning and logistics for a large-scale college fest. **Mumbai Hack** — Hackathon Participant (Nov 2025).
